CONSTITUTIONAL HISTORY

The Constitution of the United States is the supreme law of the land. It is the foundation of the government and the rights of the people.

The Constitution is a living document that has been interpreted and amended over time. It is the result of the wisdom and compromise of the Framers.

The Constitution is the cornerstone of our democracy. It guarantees the rights of all citizens and provides the framework for the government.

The Constitution is the source of the power of the government. It is the authority that the government derives from the people.

The Constitution is the basis of the federal system. It divides the powers between the national government and the states.

The Constitution is the guide for the government. It tells the government what it can and cannot do.

The Constitution is the promise of the future. It is the hope that the government will always be for the people.

The Constitution is the heart of our nation. It is the soul of our people.

The Constitution is the legacy of the past. It is the gift of the Framers to us.

The Constitution is the future of our nation. It is the path we must follow.

The Constitution is the truth. It is the only way to live.

The Constitution is the law. It is the rule of the land.

The Constitution is the justice. It is the fair play of the game.

The Constitution is the peace. It is the harmony of the world.

The Constitution is the love. It is the bond that binds us.

The Constitution is the life. It is the breath of the nation.

The Constitution is the light. It is the sun of the future.

The Constitution is the hope. It is the dream of the people.

The Constitution is the faith. It is the belief in the good.

The Constitution is the courage. It is the strength to stand.

The Constitution is the wisdom. It is the knowledge of the truth.

The Constitution is the power. It is the ability to do.

The Constitution is the glory. It is the honor of the nation.

'COPYQUEST' DOCUMENT DELIVERY SERVICE

Photocopies or loans of the complete documents referred to in Rapra Abstracts may be ordered using pre-paid vouchers which are available in batches of 20 at the following prices:

UK	£70 + VAT
Overseas	£85
Rapra Members	£55 (+ VAT if paying by cheque in the UK)

(A minimum charge of £10 will be made for individual copies ordered without vouchers).

Documents will be despatched within 48 hours. If you need them faster then fax is available at an additional charge.

Please return to:

MICRON and MICROSCOPICA ACTA

Pergamon Press

Oxford New York
Beijing Frankfurt San Paulo Sydney Tokyo Toronto

Micron & Microscopica Acta serves as an interdisciplinary forum for all work which involves the application, practice or theory of transmission and scanning electron microscopy, electron probe microanalysis, electron instrumentation and techniques associated with electron microscopy. The journal also publishes papers and reports on optical and electron image analytical systems, including computer image processing. Papers where optical microscopy and optical systems are closely linked to electron microscopy are acceptable.

The journal is published quarterly in English and embraces original research work in biology, medicine, metallurgy and materials sciences and physical sciences.

New Patents Section — The journal now contains abstracts and illustrations of recently issued United States Patents and published patent applications filed from over 30 countries under the Patent Co-operation Treaty.

PERGAMON PRESS

Polymer Science USSR features original papers and reviews in polymer chemistry and physics. It is a cover-to-cover translation of the Russian polymer journal *Vysokomolekulyarnye soyedineniya* (series A) and as such, provides information on important research being undertaken in major Soviet Union laboratories.

Some areas covered are:

The preparation and properties of all types of polymers, organic and inorganic, natural and synthetic; studies on the kinetics and mechanisms of polymerizations; the thermodynamics and mechanical properties of high molecular weight compounds; applications and developments of techniques of analysis both chemical and physical; auto-oxidation and chemical modification; visco-elasticity and relaxational properties of polymers.

Polymer Science USSR offers an opportunity for those engaged in polymer research to keep abreast of all major research efforts being made in the USSR through the reading of one journal.

POLYMER SCIENCE USSR

A translation of
*Vysokomolekulyarnye
soyedineniya* (series A)

Editor-in-Chief: V A KARGIN
Deputy Editor-in-Chief: P V KOZLOV
Scientific Translation Editor: W COOPER,
Aldridge, Walsall, UK

A selection of papers

Synthesis of organometallic polymers,
V A SERGEREZ & L I UDOVINA.

Flow birefringence of polyamide
benzimidazoles, G M PAVLOV &
A N KOZLOV.

Water soluble anion exchange polymers,
B TURLEYBEKOVA & B R TAUSOROVA.

Photopolymerization in the presence of
amines, V M GRANCHAK *et al.*

Lanthanide catalysts for diene
polymerization, N G MARINA *et al.*

Initiating radicals from peroxides and
tertiary amines, Ye P YEFREMOVA *et al.*

Polydiphenyl phthalides, M G ZOLOTUKHIN
et al.

Antimony oxide reaction with organic
chlorine compounds in polyolefins,
S S FEDEYEV *et al.*

Structural transitions from positive
annihilation, P U ARIFOV *et al.*

Fracture of ultrathin fibres in polymer
extrudates, M V TSEBRENKO &
G P DANILOVA.
